

FALL 2025 COLLABORATIVE-WIDE MEETING

BREAKOUT SESSIONS

Beyond the Emergency: Integrating Community Paramedicine with Hospital Care - Tri-Hospital EMS & McLaren Port Huron

Community Paramedicine leverages partnerships between hospitals and EMS to expand access to care beyond emergency response, focusing on prevention, follow-up, and chronic disease management. Learn how this collaboration reduces readmissions, improves patient outcomes, and strengthens continuity of care within the community.

Cardiac Rehab Referrals: After the Click - MyMichigan Health

After a cardiac rehab referral is placed, delays can contribute to barriers in initiating care. Learn factors that contribute to those delays including location, external referrals, and organizational structure, and explore collaborative solutions to ensure all patients get high-quality care. An MVC led review of live cardiac rehab data registry reports will provide members with key insights to their site's cardiac rehab utilization.

Enhancing Health Through Community Partnerships - McLaren Bay Region - FULL

McLaren Bay Region's Family Health and Wellness Center is a primary care office serving a population in which more than 80% of patients are struggling with non-medical drivers of health. Learn how a pilot program with United Way Bay County identifies variation in healthcare needs in the community and ensures non-medical needs are met.

Traverse City Street Medicine: Meeting Patients Where They Are - Munson

The Traverse City Street Medicine program began in 2016 through a unique partnership with Munson Healthcare, Goodwill Northern Michigan, Traverse Health Clinic, and MSU College of Human Medicine's Traverse City campus. Learn how a multidisciplinary team can serve its community, teach, and improve access to primary care for people living with housing insecurity.

The Roadmap to Success: Engaging Physicians in Avoiding Hospital Readmissions - Trinity Health Livonia - FULL

Predictive analytics and risk assessment tools in EMRs enable physicians to proactively identify gaps in care and tailor interventions. Learn how this approach impacts readmission rates, post-discharge rates, and comprehensive care transition plans.
