The Michigan Value Collaborative (MVC) presents its 2023 Fall Semi-Annual Meeting focused on health equity, health disparities, and interdisciplinary collaboration. It will provide networking opportunities and present pertinent information for MVC hospital and physician organization members. Data will be shared to inform MVC members of opportunities to bridge and measure success between implementation and population health outcomes and the variation in efforts related to health equity. Topics will include health equity frameworks for quality improvement, unblinded claims-based data, and inter-organizational partnerships to improve patient outcomes. After the activity, the following patient outcomes will be improved: equitable clinical care, readmission reductions, patient experience, treatment adherence, patient education, post-discharge follow-up, and connection to community resources.
