

Breakout Sessions

Developing a Heart Failure Care Management Program

Presenters: Heidi Steinhebel, RN, BSN, CCM, Senior Associate Director of Care Management & Caitlin Valley, MHA, MPH, CHES, Director of Quality and Population Health
Trinity Health IHA Medical Group

As we prepare for value-based reimbursement in the primary care payor-realm, the heart failure population is expected to rise to 8.5 million Americans and preparing is vital. Effective care management is crucial for enhancing the management of this population by implementing cost-effective strategies that enhance quality and improve outcomes.

Catalyst Community for Improvement: Transforming Performance Together

Presenter: Adrien Ross MSN, RN, CPHQ, Lead, Quality Improvement Specialist
Corewell Health's Catalyst Community for Improvement (CCI)

Corewell Health's Catalyst Community for Improvement (CCI) accelerates systemwide performance by unifying teams around a structured, data-driven improvement model. Through standardized coaching, shared governance, and cross-regional collaboration, CCI builds capabilities, reduces variation, and strengthens operational reliability. The program empowers multidisciplinary teams to identify high-impact opportunities, execute evidence-based interventions, and sustain measurable gains in quality, safety, and experience. By combining consistent methodology with real-time data and leadership alignment, CCI creates a scalable engine for continuous improvement, driving faster outcomes, stronger engagement, and a culture of shared accountability across the organization.

Rural & Critical Access Hospital Claims Data Reporting Strategies

Presenter: Michigan Value Collaborative

Join MVC to discuss claims data strategies for rural and critical access hospitals. We will dive into previous push reports and custom reports that have been valuable to our members' QI work, and we will have engaging discussion on how claims data can be used going into the future.

Roadmap to Building a Strong Post-Acute Care Network

Presenter: Belinda Dokic, CPhT, BA, MBA, THAM PAC Manager & Cindy Ingersoll, RN, BSN, CCM, THAM PAC Manager

Trinity Health Alliance of Michigan

Building a high-performing post-acute network is essential to improving patient outcomes and driving operational excellence. Successfully identifying at-risk populations, deploying targeted interventions, establishing consistent standards of care, and ensuring reliable handoffs across different care settings require intentional alignment with high-quality post-acute partners. Our new statewide programs bring this alignment to life by standardizing care transitions, strengthening coordination between inpatient and post-acute teams and

Advancing System-Level Quality Improvement: Exploring Concepts for New MVC Metrics

Presenters: Hari Nathan, MD, PhD, MVC Medical Director, Emily Woltmann, PhD, MSW, MVC Project Manager

Michigan Value Collaborative

Join this interactive breakout session to learn about MVC's goals and vision for future system-level metrics designed to support health system-wide quality improvement. MVC will share several early concepts for potential metrics and invite participants to provide feedback on their relevance, feasibility, and value for driving system-level change. This session is intended for system-level quality and clinical leadership interested in shaping the development of new meaningful metrics.
